EDUCATION

University of Science, VNU-HCM

Sep 2024 – Exp. 2028

B.Sc. in Computer Science | Advanced Program - Artificial Intelligence Track

- **Relevant Coursework:** Data Structures & Algorithms, Computer Networks, Operating Systems, Artificial Intelligence, Cryptography.

PROJECTS

AI Malware Classifier

2025

Personal Project | Python, TensorFlow, Scikit-learn

- Built a Machine Learning model to classify malware based on static behavior analysis.
- Collected and pre-processed over 10,000 real-world samples, achieving 94% accuracy on the test set.

Network Vulnerability Scanner

2024

Academic Project | C++, Python, Kali Linux

- Developed an automated tool to scan common security vulnerabilities within local networks.
- Generated detailed reports on potential security risks and recommended mitigation strategies.

SKILLS

Programming Languages: C/C++, Python, JavaScript/TypeScript, Bash.

Technologies & Tools: Next.js, Tailwind CSS, Git/GitHub, Docker.

Security: Kali Linux, Metasploit, Wireshark, Basic Reverse Engineering.

Languages: English (IELTS 7.0 - Professional working proficiency).
